ACR-PM-1-6 – Technical Specifications – Pump Modul

Technical specifications:

Pump Capacity	kW	1,1
Voltage / Electrical Connection	400V/3/N/PE	CEE16A Socket
Operating current	A	2,3
Degree of protection	Type	IP 55
Flow rate min / max	m ³ /h	1 / 6
Pressure head min / max	m	25/62
Max. operating pressure	bar	10
*Water connections	Storz	C
Filter	Type	KSB / DN 50
Weight	kg	230
Dimensions (l x w x h)	mm	1600x720x1460

* Connections individually configurable on request

Optionally accessories

Cold Water Tubes

Heat Exchanger

Electrical Cables

Ext. Buffer Storage

Different requirements and applications can be provided on request!

Technical description:

External pump module with CEE 16A plug, with high-pressure pump, frequency converter, switch cabinet, dirt trap, gate valve and fittings mounted on a stable base frame. Extensive accessories are available as options.
