ACR-PM-8-79 – Technical Specifications – Pump Modul

Technical specifications:

Pump Capacity	kW	7,5
Voltage / Electrical Connection	400V/3/N/PE	CEE16A Socket
Operating current	A	14,6
Degree of protection	Type	IP 55
Flow rate min / max	m ³ /h	8 / 79
Pressure head min / max	m	18 / 35
Max. operating pressure	bar	6
*Water connections	Storz	B
Filter	Type	KSB / DN 80
Weight	kg	415
Dimensions (l x w x h)	mm	1750x760x1470

* Connections individually configurable on request

Optionally accessories

Cold Water Tubes

Heat Exchanger

Electrical Cables

Ext. Buffer Storage

Different requirements and applications can be provided on request!

Technical description:

External pump module with CEE 16A plug, pump, frequency converter, dirt trap, gate valve and fittings mounted on a stable base frame. Extensive accessories are available as options.
